

How to add user to Azure DevOps project?

Note: The user having access type as "**Admin**" only can onboard other members in Azure DevOps project.

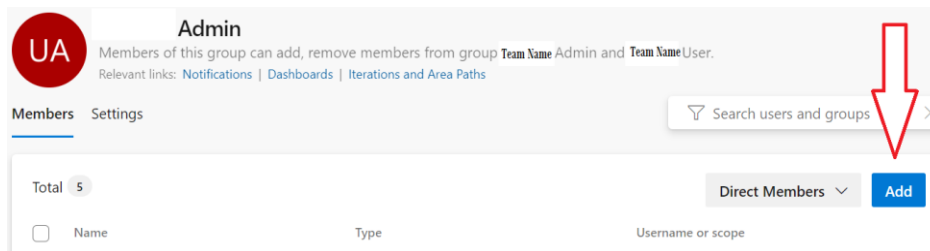

The process for onboarding other members in Azure DevOps project is as below:

1. Adding user for Admin access type

a. Go to Project Settings and select *Admin* under *Teams* section of *General* tab.

b. Click on *Add* button.

c. Search the *e-mail* of the member you want to add and click *Save*.

Invite members to
