**To:** DevSecOps Modernization  
**Subject:** Reminder: Enterprise Jira and Confluence upgraded to Cloud versions

## Why am I receiving this communication?

This is a reminder for upcoming cloud migration.

You have been identified as having access to Enterprise Jira and/or Confluence.

## What do I need to know?

Enterprise Jira and Confluence applications will be upgraded to cloud versions. The new Jira and Confluence Cloud versions have additional new features. Please take some time to review the [enhancements](#) and [FAQs](#).

Migrations will happen as shown in the schedule below. Due to the volume of data, we have planned for a batched approach should it be required.

| Date/Time (ET)   | Application Impact   | Application Go-Live (ET)                                 |
|--|--|--|
| Friday, September 16 at 8 p.m. – Sunday, September 18 at 11 p.m. | All Atlassian tools (Jira, Confluence, Bamboo, Crowd, Bitbucket and Onboarding Tool) will be unavailable         | Jira Cloud Version Go-Live by September 18 at 11 p.m.    |
| Friday, September 30 at 8.00 p.m. – Sunday, October 2 at 11p.m.  | Read only access for Confluence starts on <b>September 28<sup>th</sup> at 12.00a.m.</b> for pre-migration freeze | Confluence Cloud Version Go-live by October 2 at 11 p.m. |

Please see the [schedule](#) for the migration.

Starting from September 28<sup>th</sup>, 2022, you will have Read Only access to your current Confluence page. Communication and details will be sent prior to migration.

## Decommissioning of Jira and Confluence Data Center versions

Auto-onboarding new projects to Jira and Confluence Data Center versions will not be available as of Friday, August 19 as pre-migration activities start for all projects.

Existing on-premise Jira and Confluence Data Center versions and servers will be decommissioned after the migration has been completed.

Access to projects in Data Center versions will be removed on the following dates:

| Data Centre                       | Access removed date (ET)   |
|-----------------------------------|--|
| Enterprise Jira Data Center       | Friday, September 16 at 8 p.m.   |
| Enterprise Confluence Data Center | Read-only access, September 28 <sup>th</sup> at 12.00 a.m.<br>Full access removal by October 2 <sup>nd</sup> at 11p.m. |

### Onboarding with Enterprise Jira and Confluence Cloud versions

The [DevOps Onboarding Tool](#) will automatically create projects, view, and edit permissions in Enterprise Jira and Confluence Cloud versions.

### Integrating with GitHub Enterprise Cloud

Developers will be able to link Jira tickets to their GitHub repositories. Please see the details [here](#).

## What do I need to do?

### Logging in to Enterprise Jira and Confluence Cloud post-migration

Post-migration, the new URL for Enterprise Jira and Confluence Cloud will be <https://bmo.atlassian.net> and current URLs will no longer be accessible. There will be a redirect for links within the applications, but external links in your Bookmarks and documentation will need to be manually updated.

If you are prompted when logging into the application post-migration, use your primary BMO email address (first.last@bmo.com) and the password you use to log on to your computer.

If you are using your BMO email address for other Atlassian products (non-Enterprise) you may be required to enter the password you use to log on to your computer to connect. The password you previously set up to connect to non-Enterprise Atlassian products may no longer work.

## Support

- For technical assistance after migration, raise an [Incident](#) in ServiceNow.
- For migration inquiries, contact us in [Microsoft Teams](#).
